

CLEAN CITIES GRANTS
PRELINARY-NOTICE OF FUNDING AVAILABILITY
January 26, 2006

The U.S. Department of Energy announced Clean Cities Project funding availability for Federal Fiscal year 2006. Approximately \$2,000,000 nationwide is available for award to Clean Cities eligible applicants. All proposals are required to be submitted by stakeholders from Clean Cities Coalitions. There are 4 categories of activity for proposals due the summer to increase use of AFVs to reduce emissions and energy consumption. Funded projects must display Clean Cities decal. The Official Request For Proposals should be released the end of April.

Category A - Clean Cities AFV Incremental Cost to promote acquisition of commercially-available AFVs that maximize alternative fuel use.

Category B - Clean Cities Refueling Infrastructure projects are to promoting infrastructure development including new dispensing facilities or equipment upgrades and improvements to existing AFV refueling sites..

Category C - Clean Cities Idle Reduction Technologies projects are to promote reduction and/or eliminate engine idling of heavy duty vehicles by funding demonstration and evaluation projects for sustainable technologies for energy efficiency.

Category D - Clean Cities Fuel Economy projects are to promote the use of energy efficient vehicle and activities to increase fuel economy.

For further information and DOE solicitation documents, prospective applicants should contact: Bill Young, Space Coast Coalition Coordinator at (321) 638-1443 or via young@fsec.ucf.edu.
